## PROFESSIONAL SUMMARY

Full-stack & AI engineer with production experience building backend systems, cloud-native deployments, and agentic AI infrastructure for an enterprise agentic AI platform serving large-scale renewable energy clients.

## SKILLS

**AI & Agentic Systems:** LangChain, Model Context Protocol, LLM Guard, ChromaDB, RAG, Python, Claude

**Web Development:** JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, FastAPI, REST APIs, HTML, CSS

**Databases:** PostgreSQL, MongoDB, MySQL, Redis

**Cloud & DevOps:** Azure, Kubernetes, Docker, Docker Compose, GitHub Actions (CI/CD), GHCR, AWS S3

**Core CS:** Data Structures & Algorithms (Java), Operating Systems, DBMS, OOP, Computer Networks

## EXPERIENCE

**Intern – Full Stack & Agentic AI Developer | Sanchai Analytics Pvt. Ltd., Pune** Jan 2026 – Present

- Redesigned the Memory MCP server, replacing a dual-database architecture (Postgres + FAISS) with a single ChromaDB collection — cutting infrastructure code ~90% (700→80 lines) and eliminating a 30–60s startup rebuild.
- Built a prompt-injection detection microservice as a pre-inference security layer, blocking malicious queries and protecting internal system prompts.
- Built a MongoDB MCP server, extending the platform's SQL-only data layer to NoSQL clients — deployed across 3 client environments, running aggregation queries over SCADA collections with 5M+ records.
- Validated a Docker-to-Kubernetes sandbox migration via local POC using KIND. Collaborated with client teams and internal ops to gather requirements, informing infrastructure decisions.

*Technologies Used:* Python, FastAPI, LangChain, MCP, ChromaDB, Docker, Kubernetes, MongoDB, PostgreSQL, Claude

**Industrial Project – Web Application for Assessment | Datatrendz Solution, Pune** Aug 2024 – Dec 2024

- Built backend (MySQL) to capture and store student test responses with real-time dashboard summaries; Integrated Gemini AI to automate result summarization, reducing manual evaluation effort.

*Technologies Used:* React.js, Node.js, Express.js, MySQL, Docker, Gemini AI

## ACADEMIC PROJECTS

**AI-Powered Classroom — Plagiarism & AI-Text Detection Platform** [GitHub](#) | [Live Demo](#)

- Engineered a plagiarism detection backend using semantic search and AI-text classifiers (FAISS, BM25, sentence-transformers) with AWS S3-stored PDF reports.
- Built classroom workflows with async processing (BullMQ, Redis) and containerized microservices (Node.js, FastAPI), achieving 28ms average latency at ~612 req/sec.

*Technologies Used:* Next.js, React, TypeScript, Node.js, Express, FastAPI, PostgreSQL, Redis, BullMQ, FAISS, AWS S3, Docker

## EDUCATION

|                                                                                                 |      |
|-------------------------------------------------------------------------------------------------|------|
| <b>B.Tech in Information Technology   Vishwakarma Institute of Technology, Pune — CGPA: 8.5</b> | 2026 |
| XII (HSC)   Aspire International Junior College, Nagpur — 86.67%                                | 2022 |
| X (SSC)   St Paul's High School, Nagpur — 91.40%                                                | 2020 |

## ACHIEVEMENTS

- Co-authored and published a research paper in IEEE Xplore based on the "Plagiarism Detection and Task Management" project.
- Secured 2nd place in Best Innovative Project award (AI Innovate 2024 – Dept. of IT, 360+ students).
- Semi-finalist (CPL 2024, Top 4/231 teams) and Finalist (TechnoFEA 2.0, Top 10/200+) — VIIT Pune hackathons.
- Solved 450+ Data Structures & Algorithms problems on LeetCode.
